1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hermann et al, US Patent No. 6,332,943.

The rejection under 35 USC 102 is repeated for reasons clearly set forth in the preceding office action. This reasoning is also applied in the rejection under 35 USC 103.

Hermann et al discloses all of the claimed components of applicant's invention. This includes dispersed colorant, dispersant, polytetrahydrofuran, solvent, water and binder. The components are utilized at weight ratios that clearly overlap applicant's claimed amounts. No patentable difference is readily ascertained. It would have been obvious to one of ordinary skill in the art to utilize the components disclosed by Hermann et al at their prescribed weight ratios in the manor set forth by patentee.

4. Applicant's arguments filed 8/29/03 have been fully considered but they are not persuasive. Applicant argues that the Hermann et al invention does not employ

Art Unit: 1714

tetrahydrofuran. This is incorrect. See col. 10, line 44 wherein this component is clearly set forth.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
